

# AGS TECHNOLOGY CENTER

## AGS Tech Center

Discover and experience how light performance can help you sell more diamonds.

Join Patrick, Clayton, and Debbie for presentations on various topics and products that are available to American Gem Society members. Each presentation is followed by a hands-on LAB in which you can receive individual attention to your questions about ASET tools, the Diamond Quality® Certificate, and Provisional Grading of mounted diamonds.

This is also your headquarters for Colorvision evaluation. Make your appointment through registration — screening only takes about 10 minutes – and is available Wednesday, Thursday, and Friday. This is a requirement of all CGAs; however, it's valuable for anyone who is identifying and/or appraising color gemstones. \$39 fee for Colorvision.

See scheduled times on previous page.

### Thursday, April 22

3:00pm–4:00pm
