

INTRODUCING THE AGS IDEAL® REPORT BROUGHT TO YOU BY GIA

It's true. The American Gem Society (AGS) and GIA (Gemological Institute of America) have a history together. Now, together, we are going to build on that history.

We each have made an impact on the industry. GIA created the 4Cs, establishing the universal standard for diamond grading, while AGS created light performance and ignited a discussion on sparkle.

Introducing the AGS Ideal® Report brought to you by GIA. A digital supplemental report providing the unparalleled AGS Light Performance, backed by rigorous science, with GIA's industry-leading diamond grading reports.

Available for Round Brilliant and fancy-shaped natural or laboratory-grown diamonds, D-to-Z, with or without the ASET®.

AGS Light Performance and GIA diamond grading, together.

QUICK FACTS ABOUT THE AGS IDEAL® REPORT

Eligible GIA Reports	Diamond Grading Report, Diamond Dossier®, Laboratory-Grown Diamond Report, Laboratory-Grown Diamond Report Dossier, eReport, and Diamond <i>FOCUS</i> ™ Report.
Format	The AGS Ideal® Report is a digital-only supplemental report to GIA's 4Cs reports.
Qualifications for AGS Ideal® Report	Round Brilliant: GIA Triple Excellent (Excellent Polish, Excellent Symmetry, Excellent Cut), D-to-Z Color. Fancy Shape: Excellent Polish, Excellent Symmetry, D-to-Z Color, Qualifying Stone Shape, and Facet Arrangement. Light Performance: AGS Ideal® 0.
